Create user interface designs, create and manage design systems; Develop interactive and user interface components using CSS, HTML, Javascript and reactjs. Build website for clients; Learned Modular System and design System; Learned to work in a high paced environment.

\_august 2021 ~ present [freelancer]

**Hoang Tam Export Garments Company Limited**

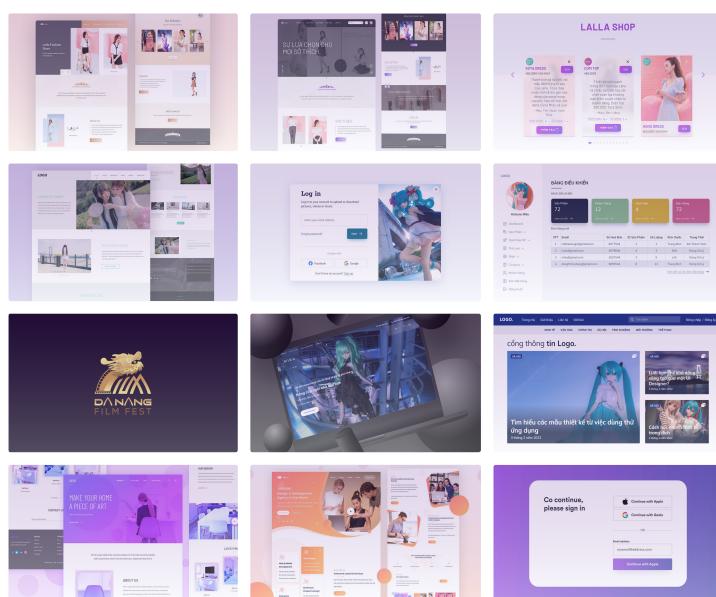

Hoang Tam Export Garments Company Limited is an enterprise specializing in the production of garment products for export. I was responsible for the concept, responsive User Interface Design, front-end development and SEO of this brand's website. It has a simple and clean design but with a couple of animations and interactions that help the user to have a better and more interesting experience.
